SECURE SAVING AND SHARING

LIVESTREAMING AND VIDEO CONFERENCING

Standard whiteboards are prized for their immediacy and convenience but are not designed to meet the needs of the modern enterprise. Collaboration at a large scale requires efficient remote communication and secure information sharing.

Make your whiteboard enterprise-ready with Kaptivo.

Kaptivo, a camera that attaches to any whiteboard, automatically saves images and shares content in real time without changing the way you work. Whiteboard images are instantly enhanced to remove any reflections, glare, and people blocking the board. Kaptivo transforms the economical whiteboard into a powerful collaboration tool.

FASTER, BETTER REMOTE COLLABORATION

Empower distributed teams with real-time access to whiteboard content on any device or via any video conference system. Better remote communication means less costly travel.

BOOST PRODUCTIVITY AND ENGAGEMENT

Quickly save and share whiteboard notes during or after the session. Let everyone participate in the discussion instead of getting distracted by note taking or photo breaks.

SECURE COMPANY INFORMATION

Give employees a secure option for saving whiteboard content. Automatically-captured high-quality images mean employees will want to use Kaptivo over vulnerable phones or web cameras.
