Setup instructions:

1. Switch On/Off: Switch-up is power-on, switch-down is power-off. One digit number on the left of the screen is for volume display, and double digit numbers on the right is for channel display.
2. Change Channel: When device is switch on, press the “FUN” and “∨” buttons at same time until the screen appears the flickering ‘CH’ to set or change channels. The screen display will show Channel number (00-99). Only when the transmitter and receiver are at the same channel, the tour guide system will work.
3. Transmitter volume Control: When transmitter is switch on, use “^” and “∨” to adjust volume. For example: Choose from 1- 4will transmit a larger sound for audio data input.
4. Receiver volume Control: When receiver is on, use “^” and “∨” to adjust volume.
5. Charging: please make sure all devices in the turn-off state when charging. The light will be off when charging is finished. Charging time is about 4 hours and please do not charging device over 8 hours.

Usually, a tour guide system consists of a microphone transmitter for the presenter, receivers with headphones for the audience and a charger storage case.
